Can I Use My Reebok Smartwatch for GPS Navigation While Driving?

Inas B. - 2026-11-24 - Before You Buy

No. Reebok smartwatches use GPS for supported outdoor fitness activities, such as walking, running, and cycling. They do not provide driving navigation, turn-by-turn directions, or route guidance through services such as Google Maps.

For driving directions and navigation, use your smartphone or a dedicated GPS navigation device.
