How to Use Automatic Sport Recognition on Your Reebok Stride

Inas B. - 2026-11-04 - Sensors & Tracking

The Reebok Stride can automatically detect when you start or stop certain activities.

Automatic Sport Recognition supports activities such as:

- Walking
- Running
- Cycling
- Elliptical
- Rowing

When the watch detects a supported activity, it displays a reminder to record the activity.

Follow the on-screen prompt to start tracking your activity.
