Can I change the Straps for my Reebok Smartwatches?

Inas B. - 2026-01-21 - [General Product Information](#)

Reebok Smartwatches are designed with **interchangeable straps**, so you can personalize your device for comfort, performance, or style. Whether you're training, traveling, or heading out, you can easily swap straps to fit the moment.

Compatibility

- Strap sizes **vary by model**. Each Reebok Smartwatch uses straps designed specifically for its case size and lug width.
- The correct strap size for your model is listed on the **product page** and in the **user manual**.
- Only straps designed for your exact model will provide the best fit and durability.
- Third-party straps may work, but we recommend **official Reebok straps** for safety and comfort.

How to Replace a Strap

1. Place your watch face down on a soft cloth.
2. Find the quick-release pin or spring bar on the inside of the strap.
3. Slide the pin inward to release the strap.
4. Insert the new strap, align it with the lug, and release the pin.
5. Gently pull to confirm it is secure.

Strap Care

- **Silicone:** Rinse after workouts with fresh water and dry completely.
- **Leather:** Avoid contact with sweat, water, or prolonged sunlight.
- **Metal:** Wipe with a soft, dry cloth to prevent tarnishing.
- Always check that straps and pins are secure before workouts or outdoor activities.
