Do the Reebok Smart Watches Support Wireless Charging?

Inas B. - 2026-01-21 - [General Product Information](#)

The **Reebok Smartwatches** do **not** support wireless charging. To charge your device, you'll need to use the **included magnetic charging cable** or a compatible Reebok charging accessory.

How to Charge Your Reebok Smartwatch

1. Plug the USB end of the charging cable into a power adapter or USB port.
2. Align the magnetic charging contacts on the back of your watch with the charger.
3. Your watch will begin charging automatically. A charging indicator will appear on the watch screen.

Charging Tips

- Always use **official Reebok charging accessories** for safe and efficient charging.
- **Avoid wireless charging pads** or third-party chargers, as they may not work and could damage your device.
- Keep charging contacts clean and dry to ensure a secure connection.
- For the fastest charging, use a USB power adapter rated at **5V/2A** or higher.

Why Wireless Charging Isn't Supported

Wireless charging requires additional hardware that increases the thickness and weight of a smartwatch. Reebok Smartwatches are designed to be **lightweight, durable, and comfortable**, which is why they use a slim magnetic charging system instead.
