Is my phone compatible with the Reebok Pulse?

Inas B. - 2026-02-13 - [Reebok Pulse](#)

Our Reebok Pulse connects seamlessly with most modern smartphones, but compatibility depends on your phone's operating system and version. Before purchasing, make sure your phone meets the requirements below.

Minimum Requirements

- **Android:** Android 10.0 or later, with Bluetooth 5.0+
- **iOS:** iPhone 8 or later, running iOS 15 or later
- **Connectivity:** Bluetooth enabled

Checking Compatibility

- On your phone, open the App Store (iOS) or Google Play Store (Android).
- Search for Reebok Connect.
- If the app is available to install, your phone is compatible.
- If the app cannot be installed, your phone may not meet the requirements.

Tip: For the best performance, keep your phone's operating system updated to the latest version.

Note: Some advanced features (like LTE calling) may be limited to certain watch models or regions.
