Does My Reebok Smartwatch Support Wireless Charging?

Inas B. - 2026-11-19 - Charging & Battery

No. Reebok smartwatches use a dedicated magnetic charging connection rather than standard wireless charging.

To charge your watch, use the supplied or approved charging cable.

How to Charge Your Watch

1. Connect the USB end of the charging cable to a compatible power source.
2. Align the charging contacts on the back of your watch with the pins on the charging cradle.
3. Allow the magnetic connector to attach securely.
4. Check the watch screen for the charging indicator.

Important: Do not use a wireless charging pad or incompatible charging accessories. Always use compatible charging equipment to help prevent damage to your watch.
